CONTENTS OF VOL. 70 Nos 1–6

NUMBER 1—JULY
PART A

High-resolution electron microscopy studies of the structure of Cu precipitates in α-Fe
By P. J. Othen, M. L. Jenkins and G. D. W. Smith 1

On the anisotropic migration of point defects in h.c.p. zirconium
By A. G. Mikhin, Yu. N. Osetsky and V. G. Kapinos 25

A new type of displacement fringe associated with martensitic transformation in transmission electron microscopy
By K. Marukawa 35

Dislocation microstructures of a TiAl single crystal with the [$\bar{1}$10] orientation deformed at 1073 K
By T. Kawabata, T. Kanai and O. Izumi 43

The effect of impurities on the ideal tensile strength of silicon
By Y. M. Huang, J. C. H. Spence and O. F. Sankey 53

Lattice relaxation around non-basal plane stacking defects in 2H martensite
By A. M. Condo and F. C. Lovey 63

Structure of V–Al_2O_3 interfaces grown by molecular beam epitaxy
By Y. Ikuhara, P. Pirouz, A. H. Heuer, S. Yadavalli and C. P. Flynn 75

Synergetic model of structure formation during plastic deformation of crystals
By Yu. G. Gordienko and E. E. Zasimchuk 99

The neighbour-switching mechanism of superplastic deformation: the constitutive relationship and deformation-enhanced grain growth
By D. J. Sherwood and C. H. Hamilton 109

A description of deformation twinning in dynamically deformed and shock-loaded polycrystalline Ni_3Al
By D. E. Albert and G. T. Gray III 145

Plastic deformation of chromium-modified $L1_2$ Al_3Ti. I. Flow behaviour
By Z. L. Wu, D. P. Pope and V. Vitek 159

Plastic deformation of chromium-modified $L1_2$ Al_3Ti. II. Weak-beam transmission electron microscopy study of dislocation structures
By Z. L. Wu, D. P. Pope and V. Vitek 171

Determination of the structure of the cubic phase in high-ZrO_2 Y_2O_3–ZrO_2 alloys by convergent-beam electron diffraction
By K. J. McCLELLAN, S.-Q. XIAO, K. P. D. LAGERLOF and A. H. HEUER 185

A dislocation mechanism of crack nucleation in cubic zirconia single crystals
By B. YA. FARBER, A. S. CHIARELLI and A. H. HEUER 201

Deformation from twin-boundary stresses and the role of texture: application to fatigue
By P. PERALTA, L. LLANES, J. BASSANI and C. LAIRD 219

PART B

Atomic force microscopy of anodized zirconium substrates
By Y. KURIMA, J. WALTON, G. E. THOMPSON, R. C. NEWMAN, G. C. WOOD and K. SHIMIZU 1

Atomic structures of Ti based decagonal approximant phases
By L. E. LEVINE, P. C. GIBBONS and A. M. VIANO 11

The spontaneous relaxor to normal ferroelectric transformation in La-modified lead zirconate titanate
By XUNHU DAI, Z. XU and D. VIEHLAND 33

Analytical calculation of time lag of homogeneous nucleation
By P. DEMO and Z. KOŽÍŠEK 49

An adiabatic model of dispersive hopping transport. II. Dispersive carrier recombination in hopping systems
By V. I. ARKHIPOV and H. BÄSSLER 59

The influence of δ′ precipitates on the electrical resistivity and low-field Hall coefficient of Al–Li alloys
By N. BOUKOS, C. PAPASTAIKOUDIS and E. POLYCHRONIADIS 67

^{63}Cu nuclear magnetic resonance analysis of mechanical alloying processes in copper–zinc powders
By BAI-QIN LI and YE-NING WANG 77

Non-isothermal transformation of Pb-modified Ge–Se glasses
By M. K. RABINAL, N. RAMESH RAO, K. S. SANGUNNI and E. S. R. GOPAL 89

ESR of defects R14 and R15 in irradiated type Ia and IIa diamond
By M. A. LEA-WILSON, J. N. LOMER and J. A. VAN WYK 101

Mobility field dependence in a-Ge : H, a-SiGe : H, compensated a-Si : H, amorphous multilayer Si/SiGe/Si and the long-range potential fluctuation model
By E. Z. LIU, P. WICKBOLDT, A. E. WETSEL, D. PANG, J. H. CHEN and W. PAUL 109

Influence of vacancies and mixed valence on the transport processes in solid solutions with the spinel structure
By T. GRÓN 121

Defect creation in hydrogenated amorphous silicon films induced by vacuum ultraviolet light from synchrotron and undulator radiation
By Y. SAITO and A. YOSHIDA 133

Simulation study of grain growth in layered materials. Application to $YBa_2Cu_3O_{7-\delta}$ ceramics
By ZHI-XIONG CAI and D. O. WELCH 141

Scanning tunnelling microscopy observations of the evolution of small-scale topography on gold surfaces following irradiation with low-energy argon ions
By V. VISHNYAKOV, S. E. DONNELLY and G. CARTER 151

Book reviews 159

NUMBER 2—AUGUST
PART A

Buckling of compressively strained epitaxial crystal structures
By D. R. SIDDLE and D. J. DUNSTAN 233

High-temperature plasticity and the martensitic transformation in long-range-ordered alloys
By M. AHLERS 247

HREM study of the $(01\bar{1}2)$ twin interface in zinc
By S. LAY and G. NOUET 261

HREM study of strained CdTe layer on rough GaAs(001) substrate grown by hot wall epitaxy
By W. XUEHUA, A. A. TIKHONOVA, D. E. SKLOVSKY, N. A. KISELEV and W. ZIQIN 277

Interstitial defects on {113} in Si and Ge. Line defect configuration incorporated with a self-interstitial atom chain
By S. TAKEDA, M. KOHYAMA and K. IBE 287

A mesoscopic approach to radiation-induced defect aggregation in alkali halides stimulated by the elastic interaction of mobile Frenkel defects
By E. KOTOMIN, M. ZAISER and W. SOPPE 313

Local internal stress characterization in a tensile-deformed copper single crystal by convergent-beam electron diffraction
By R. R. KELLER, H. J. MAIER, H. RENNER and H. MUGHRABI 329

Convergent-beam electron diffraction studies of epitaxial Si/SiO_2 systems
By F. BANHART and N. NAGEL 341

On fibre pull-out with a rough interface
By H.-Y. LIU, L.-M. ZHOU and Y.-W. MAI 359

Zn–Co electrodeposits: heterogeneous structure and anomalous deposition
By H. YAN, J. DOWNES, P. J. BODEN and S. J. HARRIS 373

Morphology and fine structure of zinc electrodeposits
By H. YAN, J. DOWNES, P. J. BODEN and S. J. HARRIS 391

Erratum 405

PART B

Gel formation during growth of barrier-type anodic films on aluminium
By R. DURAN-ROMERO, C. T. NI, P. SKELDON, G. E. THOMPSON, G. C. WOOD and K. SHIMIZU 163

The screened-charge model of crystal-field interaction
By R. SKOMSKI 175

Neutron diffraction and solid-state MAS-NMR studies of the structure of Y–Al–Si–O–N oxynitride glasses
By J. JIN, T. YOKO, F. MIYAJI, S. SAKKA, T. FUKUNAGA and M. MISAWA 191

Band and subband absorption of Se/CdSe amorphous multilayers
By D. NESHEVA, D. ARSOVA and Z. LEVI 205

The structure and its reconstruction in the decagonal $Al_{70}Mn_{17}Pd_{13}$ quasicrystal
By C. BEELI and S. HORIUCHI 215

A scanning tunnelling microscopy study of structure and structural relaxation in passive oxide films on Fe–Cr alloys
By M. P. RYAN, R. C. NEWMAN and G. E. THOMPSON 241

Calculation of electronic potential energy distributions and photoconductivity in hydrogenated amorphous silicon/hydrogenated amorphous silicon nitride superlattices
By HONG WANG, XUANYING LIN, KUIXUN LIN, MEIFANG ZHU and DEJUAN ZHENG 253

Improved fluorinated hydrogenated amorphous silicon alloys prepared using the hot-plasma-box glow-discharge technique
By D. M. BHUSARI, A. S. KUMBHAR and S. T. KSHIRSAGAR 263

Photoconductivity spectroscopy of hydrogenated amorphous silicon
By A. MITTIGA, P. FIORINI, L. FORNARINI, M. PETRACCA and G. GRILLO 277

Coexisting phases in the ground state of an annealed binary system with one magnetic component and competing interactions
By B. FECHNER, H. JARZĘCKA and M. AUSLOOS 295

Efficient iterative diagonalization of separable pseudopotential Hamiltonians
By S. GOEDECKER 305

NUMBER 3—SEPTEMBER
PART A

A dislocation model for strain burst in cyclic creep of substitutional solid solutions
By Z. YANG and Z. WANG 409

Barrier parameters and statistics controlling the plasticity of Ti–O solid solutions in the temperature range 20–550 K
By V. N. KOVALEVA, V. A. MOSKALENKO and V. D. NATSIK 423

Field ion microscopy investigation of the disorder-to-order transformation in $FePd_2Au$ after bombardment by Ar^+ ions
By N. N. SYUTKIN, V. V. OVCHINNIKOV, E. F. TALANTSEV and V. I. CHERNOBORODOV 439

Precipitation hardening in Al–1 at.% Ag studied by *in-situ* high-voltage electron microscopy
By R. HATTENHAUER, M. BARTSCH, U. MESSERSCHMIDT, P. HAASEN and P.-J. WILBRANDT 447

The role of electron–phonon coupling in the formation of clustered vacancy defects in elemental metals from heavy-ion irradiation
By D. K. TAPPIN, I. M. ROBERTSON and M. A. KIRK 463

Collective cosine relations and the decay of the collective correlation process in solid-state diffusion
By Z. QIN and G. E. MURCH 481

Transition behaviour of deformation mode from shearing to looping in Al–Li single crystals
By S. M. JEON and J. K. PARK 493

The domain structure of cubic zirconia in ZrO_2–CeO_2
By S. TORNG, K. MIYAZAWA, K. SUZUKI and T. SAKUMA 505

Statistical mechanical–atomistic determination of vacancy formation free energies in Cu–Ni alloys
By L. ZHAO, R. NAJAFABADI and D. J. SROLOVITZ 519

Dislocation contrast in X-ray reflection topography of strained heterostructures
By W. SPIRKL, B. K. TANNER, C. WHITEHOUSE, S. J. BARNETT, A. G. CULLIS, A. D. JOHNSON, A. KEIR, B. USHER, G. F. CLARK, W. HAGSTON, C. R. HOGG and B. LUNN 531

Structural evolution of $Bi_2Sr_2CaCu_2O_{8+\delta}$ single crystals studied by *in-situ* heating electron microscopy
By X. F. ZHANG and G. VAN TENDELOO 549

PART B

Special Issue:
Manuel Cardona—A Collection of Papers to Celebrate his Sixtieth Birthday

Editorial 309

Preface 311

Manuel Cardona
By W. PAUL 313

Beginnings and connections
By B. A. WEINSTEIN 315

Nonlinear optics of CuCl under uniaxial stress
By D. FRÖHLICH and W. NIESWAND 321

Exciton states and shallow acceptors in strained ZnTe
By H. MAYER, M. STECKERMEIER and U. RÖSSLER 335

Pressure-induced band gap reduction, orientational ordering and reversible amorphization in single crystals of C_{70}: photoluminescence and Raman studies
By A. K. SOOD, N. CHANDRABHAS, D. V. S. MUTHU, Y. HARIHARAN, A. BHARATHI and C. S. SUNDAR 347

Electrostriction coefficients in cubic crystals and their connection to phonon deformation potentials
By E. ANASTASSAKIS 359

Optical studies of strained pseudomorphic semiconductor heterostructures under external pressure
By M. CHANDRASEKHAR and H. R. CHANDRASEKHAR 369

Effects of uniaxial stress on the optical properties of GaAs and GaAs/$Ga_{1-x}Al_xAs$ single quantum wells grown on Si(001) substrates
By H. QIANG, F. H. POLLAK, K. SHUM, Y. TAKIGUCHI, R. R. ALFANO, S. F. FANG and H. MORKOÇ 381

Magneto-optical properties of biaxially strained quantum wells
By L. VIÑA, L. MUÑOZ, N. MESTRES, E. S. KOTELES, D. C. BERTOLET and K. M. LAU 397

Conquest of the band structure of semiconductors
By J. TAUC 409

The localized nature of screening in covalently bonded amorphous semiconductors
By L. LEY 417

Inelastic light scattering by the two-dimensional electron gas: fractional quantum Hall regime and beyond
By A. PINCZUK, B. S. DENNIS, L. N. PFEIFFER, K. W. WEST, and E. BURSTEIN 429

Angular dependence of resonant Raman and Rayleigh scattering in epitaxial ZnSe layers
By E. DÜNSCHEDE, H. STOLZ, W. VON DER OSTEN, D. HOMMEL and G. LANDWEHR 443

Comparison between photoluminescence and Raman scattering in disordered and ordered alloys of GaInP
By K. UCHIDA, P. Y. YU, N. NOTO, Z. LILIENTAL-WEBER and E. R. WEBER 453

Raman spectroscopic study of heterointerfaces in GaSb and InSb on GaAs and in InAs/(AlGa)Sb quantum structures
By J. WAGNER and J. SCHMITZ 467

Evolution of the electronic states of $In_xGa_{1-x}As/GaAs$ superlattices in the presence of an external d.c. electric field
By F. CERDEIRA and E. RIBEIRO 481

Remarks on the Brewster angle and some applications
By G. JUNGK 493

Piezoreflectance of pure and oxidized films of gadolinium
By V. J. HOMEWOOD, H. J. TRODAHL and M. P. STAINES 499

Optical anisotropy of ordered Sb layers on III–V (110) surfaces
By N. ESSER, W. RICHTER, U. RESCH-ESSER, P. CHIARADIA, C. GOLETTI and L. MORETTI 507

A personal tribute to Manuel Cardona, theorist
By R. M. MARTIN 521

Zero-point and isotope shifts: relation to thermal shifts
By P. B. ALLEN 527

Electronic structure of amorphous semiconducting alloys
By F. YNDURAIN and P. ORDEJÓN 535

Thermodynamic modelling of the local atomic order in amorphous alloys based on silicon and germanium
By H. EFSTATHIADIS and F. W. SMITH 547

Compositional elastic domains in epitaxial layers of phase-separating semiconductor alloys
By I. P. IPATOVA, V. G. MALYSHKIN and V. A. SHCHUKIN 557

Semiconductor heterojunctions and superlattices: band offsets and electronic structures
By N. E. CHRISTENSEN 567

Phenomenological treatment of long-wavelength polar optical oscillations in semiconductor nanostructures
By C. TRALLERO-GINER and F. COMAS 583

Spontaneous spin polarization in quantum wires
By G. FASOL and H. SAKAKI 601

Multi-anyon ions and photoluminescence spectrum of fractional quantum Hall systems
By X. M. CHEN and J. J. QUINN 617

Superconductivity in C_{60}-based solids
By M. L. COHEN 627

Comment on the linear resistivity of high-temperature superconducting compounds
By F. W. DE WETTE and A. D. KULKARNI 637

Theoretical search for bistability of apical oxygen in $YBa_2Cu_3O_7$
By A. I. LIECHTENSTEIN, I. I. MAZIN, O. K. ANDERSON and O. JEPSEN 643

Manuel Cardona—an appreciation of his many talents
By E. BURSTEIN 647

The isotope effect on the Raman spectrum of molecular C_{60}
By J. MENÉNDEZ, J. B. PAGE and S. GUHA 651

Isotopically controlled germanium: a new medium for the study of carrier scattering by neutral impurities
By H. D. FUCHS, K. M. ITOH and E. E. HALLER 661

Phonons in semiconductor superlattices studied by in-plane Raman scattering
By R. SCHORER and G. ABSTREITER 671

Attenuation and velocity of 56 GHz longitudinal phonons in gallium arsenide from 50 to 300 K
By W. CHEN, H. J. MARIS, Z. R. WASILEWSKI and S.-I. TAMURA 687

Transverse and longitudinal vibration modes in α-quartz
By J. HUMLÍČEK 699

The sound of one atom hopping: atomic manipulation on silicon surfaces by STM
By F. GREY, D. HUANG and M. AONO 711

Determination of the C_{70}/C_{60} ratio in fullerene thin films as a function of the sublimation distance and the substrate temperature using scanning tunnelling microscopy
By H. P. LANG, K. M. HEEGER, V. THOMMEN-GEISER and H.-J. GÜNTHERODT 721

Surface structures of Si(111)/Ga
By J. ZEGENHAGEN, E. ARTACHO, P. E. FREELAND and J. R. PATEL 731

Electronic Raman scattering at disordered noble- and alkali-metal surfaces
By W. AKEMANN and A. OTTO 747

Raman scattering by surface-avoiding acoustic phonons in semi-infinite superlattices
By R. MERLIN 761

Effects of interfaces on magnetic properties of Co-based multilayers
By G. GÜNTHERODT, B. HILLEBRANDS, P. KRAMS, J. V. HARZER, F. LAUKS, R. L. STAMPS, W. WEBER, D. HARTMANN, D. A. WESNER, A. RAMPE, U. A. EFFNER, H. P. OEPEN, D. WELLER, R. F. C. FARROW, B. N. ENGEL and C. M. FALCO 767

Thermally induced change in the vortex dimensionality of $YBa_2Cu_3O_7$ single crystals
By F. DE LA CRUZ, D. LÓPEZ and G. NIEVA 773

Analysis of the ^{13}C Knight shift and spin-lattice relaxation in A_3C_{60} (A = Rb or K)
By M. MEHRING, F. RACHDI and G. ZIMMER 787

Effect of oxygen on the structural phase transition of solid C_{60} studied by Raman scattering spectroscopy
By K. MATSUISHI, K. TADA, S. ONARI, T. ARAI, R. L. MENG and C. W. CHU 795

NUMBER 4—OCTOBER
PART A

Disclinations, amorphization and microcrack generation at grain boundary junctions in polycrystalline solids
By M. YU. GUTKIN and I. A. OVID'KO 561

Dynamical simulations of diffraction contrast images of straight dislocations in icosahedral quasicrystals
By Z. G. WANG, R. WANG and J. L. FENG 577

Configuration of loop patch at low strain amplitude in polycrystalline copper
By C. D. LIU and M. N. BASSIM 591

The kinetic stability of alloys having periodic minimal surface microstructures
By B. FULTZ 607

Mechanics and energetics of the Bain transformation
By F. MILSTEIN, H. E. FANG and J. MARSCHALL 621

Toughness of an interface along a thin ductile layer joining elastic solids
By V. TVERGAARD and J. W. HUTCHINSON 641

Phenomenological coefficients for matter transport by the dumbbell mechanism in a concentrated f.c.c. alloy
By D. K. CHATURVEDI and A. R. ALLNATT 657

Accurate and approximate results for the time correlation function and memory function associated with tracer diffusion in a pure crystal
By Z. QIN and A. R. ALLNATT 677

Self-consistent modelling of nonlinear visco-elastic polycrystals: an approximate scheme
By P. A. TURNER, C. N. TOMÉ and C. H. WOO 689

Irradiation creep and growth under cascade damage conditions
By C. H. WOO 713

PART B

A.c. conductivity studies of lithium thioborate glasses
By K. J. RAO, C. ESTOURNÈS, M. MÉNÉTRIER and A. LEVASSEUR 809

The effect of nucleation models on dynamic recrystallization. II. Heterogeneous stored-energy distribution
By P. PECZAK and M. J. LUTON 817

Local release effect of a structural phase transition for Gd^{3+} in crystalline $RbCaF_3$
By ZHENG WEN-CHEN 851

X-ray absorption and diffraction spectroscopy of icosahedral Al–Cu–Fe quasicrystals under high pressure
By A. SADOC, J. P. ITIÉ, A. POLIAN, S. LEFEBVRE, M. BESSIÈRE and Y. CALVAYRAC 855

Anomalous elastic properties in a C15 Laves-phase compound
By FUMING CHU, MING LEI, A. MIGLIORI, S. P. CHEN and T. E. MITCHELL 867

Total energy and electronic structure calculations of C15 Laves-phase compounds MV_2 (M = Zr, Hf or Ta): elastic properties
By FUMING CHU, M. ŠOB, R. SIEGL, T. E. MITCHELL, D. P. POPE and S. P. CHEN 881

Dopage de films de C_{60} par implantation ionique (doping of C_{60} films after ion implantation)
Par P. TROUILLAS, B. RATIER, A. MOLITON, M. GAUNEAU et P. BERNIER 893

Vacancy-type defects in large-dose neutron-irradiated silicon containing hydrogen
By XIANG-TI MENG 905

Free volumes in the quasicrystalline decagonal Al–Cu–Co phase and in the adjacent crystalline phases studied by positron lifetime measurements
By R. WÜRSCHUM, B. GRUSHKO, K. URBAN and H.-E. SCHAEFER 913

First-principle calculations of solid solubility of titanium in aluminium alloys
By WEI-TSU TSENG and J. P. STARK 919

The icosahedral and related crystal approximant phases in Ti–Zr–Ni alloys
By X. ZHANG, R. M. STROUD, J. L. LIBBERT and K. F. KELTON 927

Diamond-like carbon films investigated with positrons
By A. SALEH, P. RICE-EVANS and S. BULL 951

Sum rule for quadrature-response frequency-resolved photoluminescence spectra
By J. RISTEIN 963

Phonon Raman scattering in disordered silicon carbides
By S. NAKASHIMA, H. OHTA, M. HANGYO and B. PAŁOSZ 971

Ti–Ti Bonding in γ-TiAl and f.c.c. Ti
By Y. SONG, S. P. TANG, J. H. XU, O. N. MRYASOV, A. J. FREEMAN, C. WOODWARD and D. M. DIMIDUK 987

Collective phonon interaction and annealing of metastable defects in amorphous semiconductors
By C. GODET 1003

Book reviews 1017

NUMBER 5—NOVEMBER
PART A

Dislocations and disclinations in transversely isotropic elastic solids
By H. Y. YU and S. C. SANDAY 725

Sedimentation of atoms in condensed matter: theory
By T. MASHIMO 739

Self-diffusion in α-Al_2O_3. I. Aluminium diffusion in single crystals
By M. LE GALL, B. LESAGE and J. BERNARDINI 761

Tracer correlation factor and atomic displacements due to the noncollinear interstitialcy mechanism
By P. C. L. STEPHENSON 775

Numerical modelling of plastic multislip in metal crystals of f.c.c. type
By T. OHASHI 793

Determination of activation energy for nanometre-scale grain-boundary sliding in copper
By R. MONZEN and Y. SUMI 805

Dynamic mechanical response and thermal expansion of ceramic particle reinforced aluminium 6061 matrix composites
By R. U. VAIDYA, S. G. SONG and A. K. ZUREK 819

Transmission electron microscopy study of unhydrided, dehydrided and annealed $LaNi_5$
By A. E. M. DE VEIRMAN, A. A. STAALS and P. H. L. NOTTEN 837

Influence of Si additions on the ageing process of an Al–Cu–Mg–Ag alloy
By S. ABIS, P. MENGUCCI and G. RIONTINO 851

Diffraction contrast images of small stacking fault tetrahedra in f.c.c. metals
By Y. SATOH, H. TAOKA, S. KOJIMA, T. YOSHIIE and M. KIRITANI 869

Intrinsic ductility criterion for materials
By R. THOMSON and A. E. CARLSSON 893

Atomic structure at Ti(C, N)–TiB_2 interfaces in Ti(C, N)–TiB_2–Ni ceramics
By J. Y. DAI, Y. G. WANG, D. X. LI and H. Q. YE 905

The structure of translation twins in TiAl investigated by high-resolution electron microscopy
By J. G. ZHENG, Z. G. LIU, Q. LI, J. M. ZHU, D. FENG and G. FROMMEYER 917

PART B

Structural and spectroscopic investigation of (111) twins in barium titanate
By A. REČNIK, J. BRULEY, W. MADER, D. KOLAR and M. RÜHLE..... 1021

Correlation between a.c. transport and electron spin resonance in amorphous Ge–S films alloyed with lead
By K. SHIMAKAWA, T. KATO, K. HAYASHI, A. MASUDA, M. KUMEDA and T. SHIMIZU 1035

Low-temperature dynamics of inorganic glasses. Electrical conductivity against nuclear spin relaxation
By X. LU, H. JAIN, O. KANERT, R. KÜCHLER and J. DIECKHÖFER 1045

A comparative study of decagonal quasicrystalline phases
By B. GRUSHKO and K. URBAN 1063

A transmission electron microscopy study of lattice defects in Mn_3O_4 hausmannite
By J. J. COUDERC, S. FRITSCH, M. BRIEU, G. VANDERSCHAEVE, M. FAGOT and A. ROUSSET 1077

The injection dose effect on the evaluation of bulk and surface parameters in semiconductors
By D. CAVALCOLI, A. CAVALLINI and B. FRABONI 1095

Charge transport for a class of conducting polymers: the dependence of the mobility on applied fields
By J. M. CASADO and J. J. MEJÍAS 1111

Ground state structures in binary h.c.p. alloys using multiatom interactions
By B. NAGESWARA SARMA, N. RAVISANKAR, M. GOPAL, A. K. SINGH, R. PRASAD and S. LELE..... 1117

Phase constitution in melt-spun Al–10 wt% Y
By M. A. AL-KHAFAJI, Y. LI, W. M. RAINFORTH and H. JONES..... 1129

Irregularities in current–voltage characteristics of hydrogenated-amorphous-silicon-based barrier structures: resonant tunnelling against hopping and filamentary conduction through the barriers
By N. BERNHARD, B. FRANK, B. MOVAGHAR and G. H. BAUER..... 1139

Book reviews 1159

NUMBER 6—DECEMBER

PART A

Motion under stress of a screw superdislocation in the $L1_2$ structure
By G. SAADA and P. VEYSSIÈRE 925

On the mobility of dislocations in semiconductors
By S. A. EROFEEVA 943

The effects of temperature, composition and strain rate on the deformation microstructure of Ni_3Al
By H. F. YU, I. P. JONES and R. E. SMALLMAN 951

Grain-boundary constraint and oxygen deficiency in $YBa_2Cu_3O_{7-\delta}$: application of the coincidence site lattice model to a non-cubic system
By Y. ZHU, J. M. ZUO, A. R. MOODENBAUGH and M. SUENAGA 969

Zone-axis back-scattered electron contrast for fast electrons
By C. J. ROSSOUW, P. R. MILLER, T. W. JOSEFSSON and L. J. ALLEN 985

Multiplication of misfit dislocations in $In_xGa_{1-x}As/GaAs$ heterostructures
By A. LEFEBVRE and C. ULHAQ-BOUILLET 999

The dislocation structure in $L1_2$ ordered alloy Ni_3Ge
By J. FANG, E. M. SCHULSON and I. BAKER 1013

Interaction of slip dislocations with the $(01\bar{1}2)$ twin interface in zinc
By S. LAY and G. NOUET 1027

Atomic structures of the tips of ultra-thin twins generated in InP by (001) homoepitaxial growth
By M. LOUBRADOU, R. BONNET and A. CATANA 1045

Long-range ordering effects in metal–non-metal interfaces revisited
By J. SHIROKOFF and U. ERB 1055

Disordering behaviour of alloys based on Fe_3Al
By D. G. MORRIS, M. LEBOEUF, S. GUNTHER and M. NAZMY 1067

Effects of elastic relaxation on large-angle convergent-beam electron diffraction from cross-sectional specimens of Ge_xSi_{1-x}/Si strained-layer superlattices
By X. F. DUAN, D. CHERNS and J. W. STEEDS 1091

Sintering of regular two-dimensional arrays of particles by surface and grain boundary diffusion
By WEN ZHANG, J. H. SCHNEIBEL and CHUN-HWAY HSUEH 1107

PART B

Evaluation of multiple-scattering contribution in extended X-ray absorption fine structure for MO_4 and MO_6 clusters
By A. KUZMIN and R. GRISENTI 1161

Cathodoluminescence of brown diamonds as observed by transmission electron microscopy
By R. J. GRAHAM and P. R. BUSECK 1177

Correlation between short-range order and hydrogen bonding in hydrogenated amorphous silicon obtained by homogeneous chemical vapour deposition
By A. TONEVA, P. DANESH, L. VASSILEV and V. KUDOYAROVA 1187

The explosive disintegration of Prince Rupert's drops
By S. CHANDRASEKAR and M. M. CHAUDHRI 1195

Frequency-resolved spectroscopy and its application to low-temperature geminate recombination in a-Si : H
By R. STACHOWITZ, M. SCHUBERT and W. FUHS 1219

Electrode screening of the Coulomb gap
By E. CUEVAS, M. ORTUÑO, J. RUIZ, V. GASPARIAN and M. POLLAK 1231

Book reviews 1237

Subject index 1241

Index of authors (with titles) 1251

Books relevant to the subject areas covered in Parts A and B are reviewed in Part B
